Volume 1 Spring 2008

## New Location

PONTECH has a new location.

We have recently moved to the city of La Verne, C.A., to better serve our growing customer base and our employees. Our office is centrally located for our employees that reside in the greater Los Angeles area. Further, our new location gives us the opportunity and the ability to better serve our customers by providing faster deliveries and more consulting services.

Moreover, the new location has added over 800 square feet in operations. This additional space allows us to focus on new product development without compromising customers projects.

## New Products

ProLinear/PONTECH, Inc. is proud to announce its newest product. The Ascent® Vario altimeter. PONTECH joined forces with Ascent® to develop the smallest, and lightest altimeter, in the market, designed by paragliders for paragliders, and for outdoor enthusiasts. You can find more information at [www.ascentvario.com](http://www.ascentvario.com).

Also, a new DC-to-DC buck converter, the BUK-300, is up for grabs at [www.pontech.com](http://www.pontech.com). This is a 3-amp version of our popular BUK-100 buck converter, which provides energy efficiency. Variable voltage regulation for users concerned about efficiency delivery of power. For data sheets or for more information please call us at (909) 450-2500. Other products are available at our website [www.pontech.com](http://www.pontech.com).

You may email requests to [sales@pontech.com](mailto:sales@pontech.com).

Most products are available to ship within 24 hours from when order is placed.

## OPEN HOUSE

On March 7, 2008 our Open House was attended by industry professionals, old and new friends. PONTECH has been in business for 15 years and it continues to grow.

In appreciation, we decided to show off our new location, our new products and future business plans. We thank those that attended and we missed those that could not make it.

John, Angel, Brian, Glenda, Mary & Jacob
